- MATERIALITY MATRIX

DEFINITION

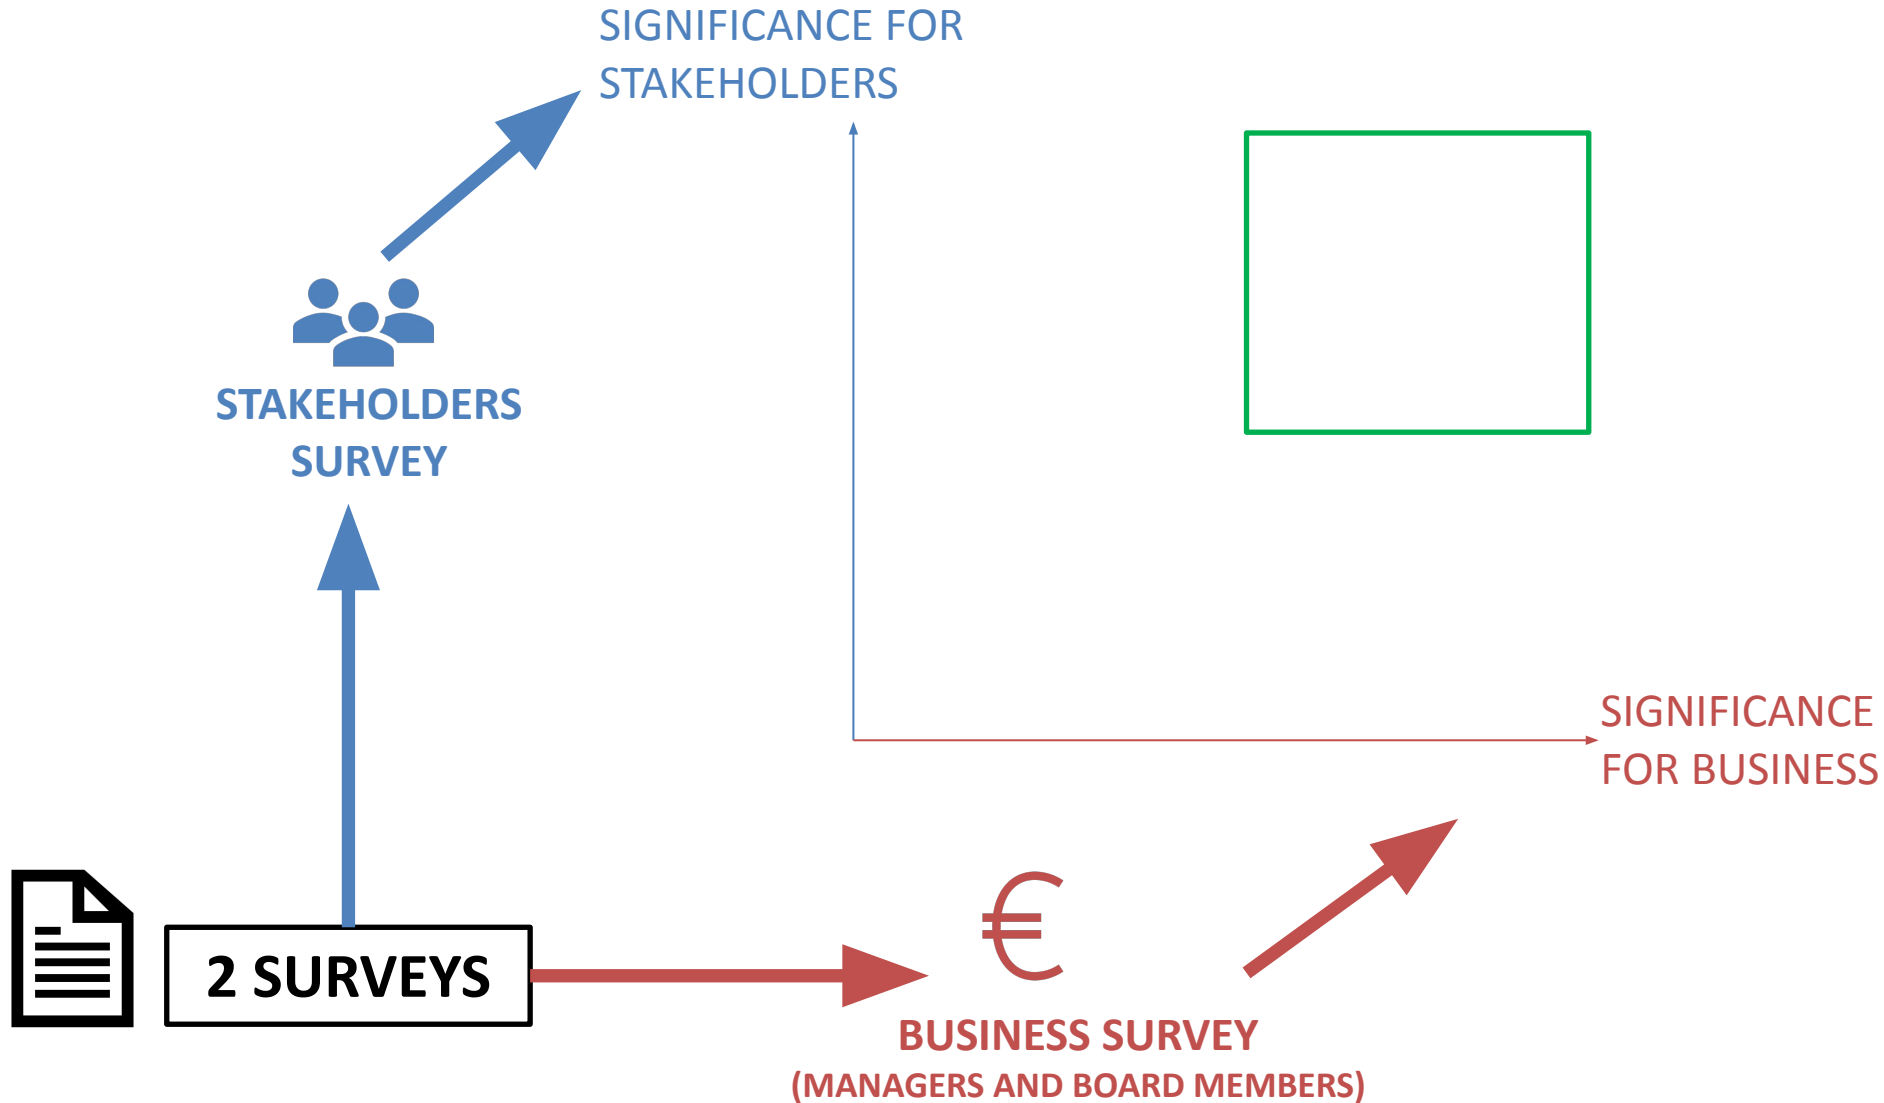

Materiality defines what can have a significant impact on a business, its activities and its ability to create financial and non-financial value for itself and its stakeholders. At the crossroads of business and sustainable development, an analysis of materiality must:

- Identify important and relevant issues that may impact on company performance
- Prioritize them according to their potential impact on the company and its ecosystem

The significance of the material issues presented in the matrix is significant or crucial
